

NORTHWIND TRADERS

Global Sales & Operations Intelligence Report
Business Intelligence Analysis | FY 2013 – 2015

\$1,265,793	830	\$1,524	91
Total Revenue	Total Orders	Avg Order Value	Customers Served

EXECUTIVE SUMMARY

Northwind Traders operates as a premier global gourmet food supplier serving 91 customers across 21 countries. This report provides a comprehensive analysis of sales performance, product intelligence, regional market dynamics, and operational efficiency spanning July 2013 through May 2015. The analysis draws from 830 orders, 2,155 order line items, 77 products across 8 categories, 9 sales employees, and 3 shipping partners.

Key Findings: Revenue grew strongly from \$208K in 2013 to \$617K in 2014, representing a 197% year-on-year increase. The United States and Germany are the dominant markets, collectively accounting for 37.6% of total revenue. Beverages is the top-performing category at \$267,868 (21.2% of revenue), while Margaret Peacock leads the sales team with \$232,891 in personally attributed revenue. United Package handles the most orders but at the highest average freight cost, suggesting an opportunity for renegotiation.

Revenue & Order Volume by Year

PAGE 1: SALES & REVENUE OVERVIEW

Monthly Revenue Trend

Sales Performance Analysis

The monthly revenue trend reveals consistent growth with identifiable seasonal patterns. Revenue accelerates sharply in Q4 each year, with December 2014 (\$71,398) and the early months of 2015 showing the highest single-month figures. January–April 2015 represent a breakout period, with April 2015 reaching \$123,799 — the single highest month on record. This seasonal uptick aligns with typical B2B procurement cycles where year-end and Q1 budgets drive bulk purchasing of premium food products.

Year	Total Revenue	YoY Growth	Orders	Avg Order Value
2013 (H2)	\$208,084	—	196	\$1,062
2014	\$617,085	+196.6%	408	\$1,513
2015 (Jan–May)	\$440,624	On track	226	\$1,950

Key Sales Insights

- Revenue in 2015 is annualizing at ~\$1.06M, representing 71% growth over full-year 2014 — indicating strong momentum.
- Average order value increased from \$1,062 in 2013 to \$1,950 in 2015, signaling customers are purchasing more per transaction.
- Q4 seasonality is consistent: November–December represent approximately 20% of annual revenue in both 2013 and 2014.
- Discounts totalling \$88,666 were applied across orders, representing 6.5% of gross revenue — a meaningful impact on margin.

Revenue by Product Category

Category Performance Analysis

Beverages dominates with \$267,868 in revenue (21.2% share), driven by premium drink products. Dairy Products follows closely at \$234,507 (18.5%), underpinned by consistent demand for cheeses and specialty dairy. Confections and Meat & Poultry round out the top four, collectively accounting for 54.3% of total revenue. Grains & Cereals is the weakest performer at \$95,745 (7.6%), presenting a potential area for portfolio review.

Category	Revenue (USD)	Share %	Status
Beverages	\$267,868	21.2%	Top Performer
Dairy Products	\$234,507	18.5%	Strong
Confections	\$167,357	13.2%	Growing
Meat & Poultry	\$163,022	12.9%	Stable
Seafood	\$131,262	10.4%	Stable
Condiments	\$106,047	8.4%	Moderate
Produce	\$99,985	7.9%	Watch
Grains & Cereals	\$95,745	7.6%	Lowest

Discontinued Products Impact

Of the 77 products in the catalogue, 8 (10.4%) are discontinued. These discontinued products generated \$90,000+ in historical revenue before removal, representing lost future sales potential. Products marked discontinued in Beverages and Dairy categories had the highest revenue histories. The business should evaluate whether any high-performing discontinued products can be reintroduced given supplier availability.

Discount Strategy Impact on Margins

Discounts were applied to orders resulting in \$88,666 in revenue reduction against gross sales. Discounted items drove higher volume but at a cost of 6.5% of gross revenue. A structured discount analysis by category shows Confections and Seafood categories received the highest discount rates, which partially explains their lower-than-expected revenue rank relative to their order volume. Management should consider tiered discount policies that protect margins in high-velocity categories.

Regional Market Analysis

Country	Revenue	Share	Avg Freight	Insight
USA	\$245,585	19.4%	\$112.88	Largest market
Germany	\$230,285	18.2%	\$92.49	Strong performer
Austria	\$128,004	10.1%	\$184.79	High freight cost
Brazil	\$106,926	8.5%	\$59.46	Cost-efficient
France	\$81,358	6.4%	\$77.26	Growing market
UK	\$58,971	4.7%	\$61.10	Stable
Venezuela	\$56,811	4.5%	\$59.46	Emerging
Sweden	\$54,495	4.3%	\$87.50	Nordic growth
Canada	\$50,196	4.0%	\$73.27	Steady growth
Ireland	\$49,980	4.0%	\$145.01	High freight—review

Shipping Efficiency Analysis

Shipper	Orders Handled	Avg Freight (USD)	Total Freight	Assessment
United Package	326 (39.3%)	\$86.64	\$28,245	Highest volume, highest cost
Federal Shipping	255 (30.7%)	\$80.44	\$20,513	Balanced performer
Speedy Express	249 (30.0%)	\$65.00	\$16,185	Most cost-efficient

Sales Team Performance

Employee	Revenue Generated	Revenue Share	Rank
Margaret Peacock	\$232,891	18.4%	#1
Janet Leverling	\$202,813	16.0%	#2
Nancy Davolio	\$192,108	15.2%	#3
Andrew Fuller	\$166,538	13.2%	#4
Laura Callahan	\$126,862	10.0%	#5
Robert King	\$124,568	9.8%	#6
Anne Dodsworth	\$77,308	6.1%	#7
Michael Suyama	\$73,913	5.8%	#8
Steven Buchanan	\$68,792	5.4%	#9

Strategic Recommendations

- **Freight Optimization:** Austria and Ireland show disproportionately high average freight costs (\$184 and \$145 respectively) relative to their revenue contribution. Renegotiating shipping contracts or consolidating shipments to these markets could yield 10–15% freight savings.
- **Shipper Strategy:** United Package processes the highest volume but at the highest average cost (\$86.64/order). Shifting 20% of United Package volume to Speedy Express could save ~\$4,300 annually in freight alone.
- **Sales Enablement:** The bottom three employees (Dodsworth, Suyama, Buchanan) together account for 17.3% of revenue. Targeted coaching and territory rebalancing modelled on top performers could close this gap.
- **Category Expansion:** Beverages and Dairy Products together represent ~40% of revenue. Introducing premium sub-categories (craft beverages, artisanal dairy) in high-revenue markets like the USA and Germany represents a significant growth opportunity.
- **Discount Governance:** Implement category-specific discount ceilings. Discounts exceeding 15% should require management approval, particularly in Confections and Seafood where they are eroding margins most significantly.
